

Call for Papers

6th International Conference on Machine Learning and Data Mining

MLDM'2009

July 23 – 25, 2009, Leipzig/Germany

Chair

Petra Perner

Institute of Computer Vision and applied Computer Sciences, IBA Leipzig/Germany

Program Committee

Agnar Aamodt	NTNU/Norway	Adam Krzyzak	Concordia University, Montreal/Canada
Jacky Baltes	University of Manitoba/Canada	Longin Jan Latecki	Temple University Philadelphia/USA
Max Bramer	University of Portsmouth/UK	Tao Li	Florida International University/USA
Horst Bunke	University of Bern/Switzerland	Brian Lovell	University of Queensland/Australia
Krzysztof Cios	University of Colorado/USA	Mariofanna Milanova	University of Arkansas at Little Rock/USA
Christoph F. Eick	University of Houston/USA	Thang V. Pham	University of Amsterdam/Netherlands
Ana Fred	Technical University of Lisbon/Portugal	Maria da Graca Pimentel	Universidade de São Paulo/Brazil
Giorgio Giacinto	University of Cagliari/Italy	Petia Radeva	Universitat Autònoma de Barcelona, Spain
Makoto Haraguchi	Hokkaido University Sapporo/Japan	Michael Richter	University of Calgary/Canada
Robert J. Hilderman	University of Regina/Canada	Fabio Roli	University of Cagliari/Italy
Tin Kam Ho	Bell Laboratories/USA	Linda Shapiro	University of Washington/USA
Atsushi Imiya	Chiba University/Japan	Sameer Singh	Loughborough University/UK
Horace Ip	City University/Hong Kong	David Steinberg	Tel Aviv University/Israel
Abraham Kandel	University of South Florida / USA	Francesco Tortorella	Università degli Studi di Cassino/Italy
Dimitrios A. Karras	Chalkis Institute of Technology/Greece	Patrick Wang	Northeastern University/USA

Aim of the Conference

The MLDM'2009 conference is the sixth event in a series of Machine Learning and Data Mining meetings, initially organised as international workshops. The aim of MLDM'2009 is to bring together from all over the world researchers dealing with machine learning and data mining, in order to discuss the recent status of the research in the field and to direct its further developments.

Basic research papers as well as application papers are welcome. All kinds of applications are welcome, but special preference will be given to multimedia related applications, biomedical applications, and webmining. Paper submissions should be related but not limited to any of the following topics:

- association rules
- applications of clustering
- applications in medicine
- aspects of data mining
- automatic semantic annotation of media content
- Bayesian models and methods
- conceptual learning and clustering
- case-based reasoning and learning
- classification and interpretation of images, text, video
- classification and model estimation
- case-based reasoning and associative memory
- content-based image retrieval
- decision trees
- deviation and novelty detection
- ensemble methods
- feature grouping, discretization, selection and transformation
- feature learning
- frequent pattern mining
- high-content analysis of microscopic images in medicine, biotechnology and chemistry
- Goodness measures and evaluation (e.g., false discovery rates)
- inductive learning including decision tree and rule induction learning
- knowledge extraction from text, video, signals and images
- learning/adaption of recognition and perception
- learning of internal representations and models
- learning of appropriate behaviour
- learning of action patterns
- learning in image pre-processing and segmentation
- learning and adaptive control
- learning robots
- learning in process automation
- learning for handwriting recognition
- learning of semantic inferencing rules
- learning of ontologies
- learning of visual ontologies
- mining gene data bases and biological data bases
- mining images, temporal-spatial data, images from remote sensing
- mining text documents
- mining structural representations such as log files, text documents and htm- documents
- mining financial or stockmarket data
- mining images in computer vision
- mining images and texture
- mining motion from sequence
- network analysis and intrusion detection
- neural methods
- nonlinear function learning and neural net based learning
- organisational learning and evolutionary learning
- probabilistic information retrieval
- rule induction and grammars
- retrieval methods
- real-time event learning and detection
- Selection bias
- Sampling methods
- Selection with small samples
- similarity measures and learning of similarity
- statistical learning and neural net based learning
- support vector machines
- subspace methods
- statistical and conceptual clustering methods: basics
- statistical and evolutionary learning
- speech analysis
- symbolic learning and neural networks in document processing
- time series and sequential pattern mining
- text mining
- visualization and data mining
- video mining

Important Dates

Deadline for paper submission extended: February 10, 2009

Notification of acceptance: April 3, 2009

Final paper submission: April 17, 2009

Authors can submit their papers in long or short version:

Please submit the electronic version of your camera-ready paper through the COMMENCE conference management system (<http://www.mldm.de/CMS/>). If you have any problems with the system please do not hesitate to contact info@mldm.de.

Long Papers

Long papers must be formatted in the Springer LNCS format. They should have at most 15 pages. Papers will be reviewed by the program committee. Accepted long papers will appear in the proceedings book "Machine Learning and Data Mining in Pattern Recognition" published by Springer Verlag in the LNAI series.

Short Papers

Short papers can be used to describe work in progress or project ideas. They should have no more than 5 pages, formatted in Springer LNCS format. Accepted short papers will be presented as posters in the poster session. They will be published in a special poster proceedings book.

Special Issue

Extended versions of selected papers will be published in a special issue of an international journal after the conference.
